OBJECTIVE

I have recently completed my bachelor's degree in **Information Systems** and have a strong interest in **software engineering**. My goal is to be part of a team that collaborates to achieve common goals and makes a positive impact on organizations or companies. I believe that with the right knowledge and skills, I can contribute to creating change and enhancing the development of structured, efficient, and up-to-date software engineering.

WORK EXPERIENCE

1. MSIB-5 Frontend Developer Intern at PT. Len Industri (Persero) -KAMPUS MERDEKA

August 2023 - December 2023

Role: Front-end Developer

I am responsible for developing the Military Command Control System using technologies such as React Js, OpenLayers, Redux Js, Microfrontend Architecture, Rest API, and others. Additionally, I am also accountable for implementing development with clean code to ensure that the developed code is well-structured and organized.

Responsibility:

- Implementation frontend using React JS with microfrontend architecture
- Create API contracts with the backend developer
- Fetching data with REST API
- Ensure clean code structure
- Conducting unit testing on each test case.

Tech Stack: *React Js | Tailwind | Microfrontend Architecture*

Development Methodology: *Agile Methodology*

2. Software Developer Intern at PT. Pindad Enjiniring Indonesia

Jul 2023 - Sep 2023

Role: Software Developer

As a Software Developer at PT Pindad Enjiniring Indonesia, I am responsible for developing the driver management system called "Driver Hub" using Laravel. My duties also include enhancing system architecture and designing the UI/UX for the Driver Hub website at PT Pindad Enjiniring Indonesia.

- Designing Architecture System
- Implementation frontend using Laravel framework
- Ensure clean code structure

Tech Stack: *Laravel*

Development Methodology: *Agile Methodology*

3. Daspro Laboratory

August 2022 - January 2023

Role: Practicum Assistant of Introduction To Programming and Logic

Daspro Lab is a laboratory that manages practical sessions related to basic programming subjects such as Algorithms & Programming, Data Structures, and Databases.

- Create modules, exercises, and presentations using python3, javascript, and php.
- Creating practicum rules and organize the students and practice assistant.
