OBJECTIVE

I have completed my bachelor's degree in **Information Systems** and have a strong interest in **software engineering**. I aim to contribute my collaborative skills to drive effective teamwork and deliver meaningful results that support organizational goals. With the right skills and knowledge, I strive to help develop structured, efficient, and up-to-date software solutions.

WORK EXPERIENCE

1. Software Engineer at Telkomedika

November 2024 - Present

Role: Software Engineer

As a Software Engineer at Telkomedika, I develop and maintain scalable, secure web applications to support business operations.

Responsibility:

- Developed, maintained, and optimized 5+ web applications across both frontend and backend, improving performance and user satisfaction.
- Optimized APIs and databases, improving performance by 30%.
- Collaborate with teams to deliver impactful features and ensure system reliability.

Tech Stack: *Laravel I React Js I Tailwind I N8n AI Agents I Javascript I PHP I MySQL*
Development Methodology: Agile Methodology

2. MSIB 5 - Frontend Developer Intern at PT. Len Industri (Persero)

August 2023 - December 2023

Role: Front-end Developer

I am responsible for developing Military Command Control System.

Responsibility:

- Implement frontend using React JS with microfrontend architecture
- Create API contracts with the backend developer
- Fetching data with REST API and ensure clean code structure
- Conducting unit testing on each test case.

Tech Stack: *React Js I Tailwind I Microfrontend Architecture I Javascript I Node Js*
